Retail is changing.
Customer expectations are changing even faster.

Today's consumers expect more than products on shelves. They want convenience, trusted brands, memorable experiences, and the ability to complete more of their shopping in one destination.

Businesses face a similar challenge. Brands need stronger platforms to grow, entrepreneurs need opportunities to scale, and technology, including e-commerce, continues to reshape the retail landscape.

The Challenge

Today's shopping experience is often fragmented.

Customers frequently visit multiple stores, online platforms, and marketplaces to complete their everyday needs.

- Groceries
- Health & Wellness
- Beauty
- Toys
- Pet Care
- Food & Beverage
- Lifestyle

Although every store serves a specific purpose, the overall shopping journey remains disconnected, time-consuming, and often inconsistent for customers.

E-commerce can make shopping faster and more convenient for customers, but from a business perspective, fulfilment, delivery, returns, platform fees, and customer acquisition can make it more expensive to operate.

The Opportunity

What if these experiences could come together?

Not as one large department store, but as a connected ecosystem of specialised brands that complement one another while maintaining their individual strengths.

A place where customers discover more, businesses grow together, and technology quietly enhances every interaction, creating a seamless, convenient, and rewarding retail experience.

This can bring together the convenience of e-commerce with the strengths of physical retail, while helping businesses operate and grow more efficiently.

It can also create new opportunities for brands to reach more customers, strengthen their presence, and benefit from a more connected retail ecosystem.

The BOGO Vision

BOGO was created to redefine the retail experience by bringing together:

- Specialised consumer brands
- Modern retail formats
- Intelligent technology
- Strategic partnerships
- Efficient distribution

Each element has a clear purpose. Together, they create an ecosystem that delivers greater value for customers, stronger opportunities for businesses, and a platform designed for long-term growth.

Redefining the Retail Experience

BOGO is creating a new way to experience retail - one built around discovery, convenience, and connection.

Rather than operating as a conventional retail chain, BOGO brings specialised businesses, innovative formats, and technology together within one connected ecosystem, creating value for customers, partners, and communities.

Each business has its own identity and purpose, while becoming stronger through the ecosystem around it. Together, they create a retail platform designed to make everyday shopping more relevant, accessible, and rewarding.

What We Believe

BOGO is built on four ideas that shape the way we create retail:

Retail should revolve around people

Every experience should be intuitive, relevant, and designed around what customers actually need.

The right brands create more value

Distinct businesses become more powerful when their strengths come together to serve customers better.

Technology should remove friction

Smart technology should make discovery, decisions, transactions, and everyday shopping simpler.

Every business should move the ecosystem forward

Growth should create lasting value for customers, businesses, partners, and the communities around them.

Our Vision

To build India's most connected retail ecosystem by bringing together trusted brands, meaningful experiences, and intelligent technology into one unified platform.

THE BOGO ECOSYSTEM

One Vision. One Ecosystem. Endless Possibilities.

Five connected pillars. One ecosystem built to make retail smarter, stronger, and more meaningful.

BRANDS

Specialised experiences

Distinct brands built for everyday lifestyles.

TECHNOLOGY

Intelligent infrastructure

Making retail simpler, faster, and smarter.

PARTNERSHIPS

Collaborative growth

Connecting businesses, entrepreneurs, and opportunities.

DISTRIBUTION

Connected movement

Moving products efficiently across the ecosystem.

RETAIL

Modern formats

Designed around changing customer needs.

WHERE IT COMES TOGETHER

CUSTOMERS

Better experiences that fit their everyday lives.

BUSINESSES

Stronger growth through shared strengths and scale.

ECOSYSTEM

Greater possibilities through connection and innovation.

BOGO

BONDS OVER GENERATIONS, OFTEN.

At BOGO, we believe the strongest businesses are built on **strong bonds.**

WE BELIEVE IN BONDS THAT MATTER.

- Bonds between **people** and **brands**.
- Bonds between **businesses** and **communities**.
- Bonds between **generations**.

RETAIL IS MORE THAN BUYING AND SELLING.

It is about the relationships we create along the way.

A trusted store becomes part of a family's everyday life.
A local brand becomes a name passed from one generation to the next.
A business grows when its customers, partners, and people grow with it.

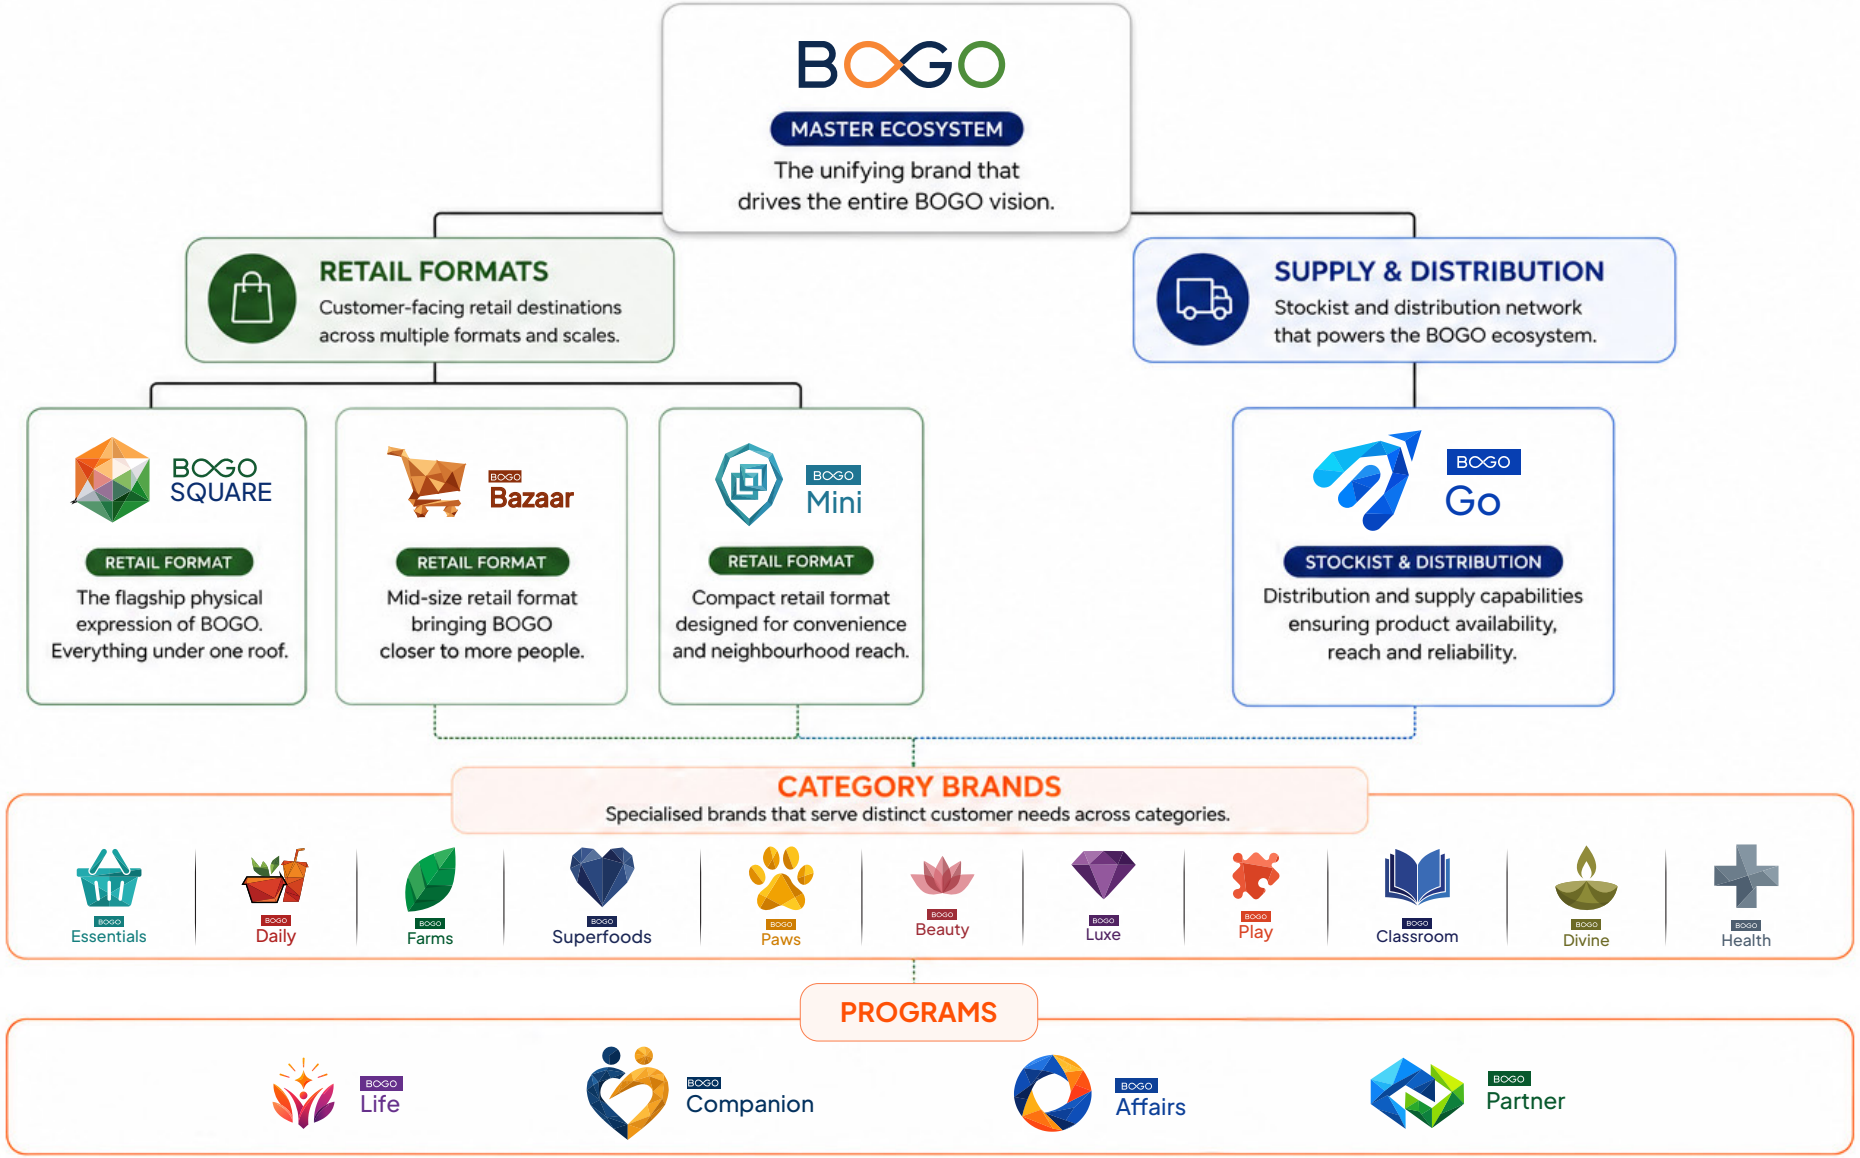

THAT IS THE BOGO MINDSET.

- To **create** connections that last beyond a transaction.
- To **bring** different businesses together without taking away what makes them unique.
- To **make** every interaction more meaningful, every relationship more valuable, and every generation part of what comes next.

WE DON'T JUST BUILD A RETAIL ECOSYSTEM. WE BUILD BONDS THAT LAST.

Specialised brands. One connected ecosystem.

BOGO brings together specialised brands, retail formats, and supply capabilities under one connected ecosystem.
Each element plays a distinct role while working together to create complete value for customers and partners.

Building the Future of Retail, One Phase at a Time

Technology at BOGO is introduced through a phased roadmap, ensuring that every innovation enhances the customer experience while creating a smarter, more connected retail ecosystem.

PHASE 1

Purchase History

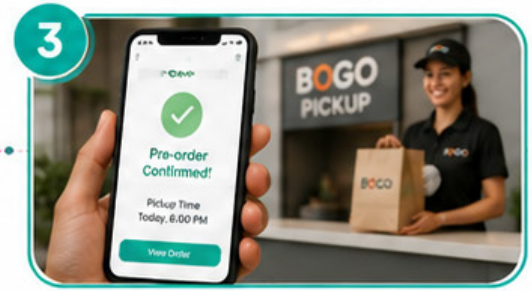

A connected shopping history that helps customers understand their purchases, track spending, and plan future shopping with greater convenience.

PHASE 2

Smart Basket

An intelligent basket that automatically tracks selected products while connecting shopping activity with the BOGO app and purchase history.

PHASE 3

Concierge Service

Customers can browse and pre-order from home, allowing them to arrive at the store and simply collect their prepared purchases.

PHASE 6

Intelligent Product Discovery

Customers can scan products to instantly access pricing, ingredients, nutritional information, origin, manufacturing details, and other insights to make informed purchasing decisions.

PHASE 5

Home Delivery

Customers can continue their shopping journey beyond the store with convenient home delivery, creating a seamless connection between retail and everyday life.

PHASE 4

Smart Trolley

An intelligent trolley transforms the in-store experience with assisted shopping, personalised services, and greater convenience throughout the customer journey.

ONE CONNECTED CUSTOMER JOURNEY

From purchase history to intelligent discovery, each phase builds on the last – creating a retail experience that becomes smarter, simpler, and more connected over time.

BOGO INFORMATION → BOGO COMMUNITY → BOGO BRANDS → BOGO INDUSTRY

Building the Future, One Step at a Time

BOGO's growth strategy is built on a phased approach that balances innovation with sustainable expansion. Each stage strengthens the ecosystem, creates new opportunities, and brings the BOGO experience closer to more communities.

01

PHASE

Build the Foundation

- Launch BOGO Square
- Establish core retail operations
- Introduce flagship BOGO brands
- Deliver a consistent customer experience

02

PHASE

Expand the Network

- Launch BOGO Bazaar stores
- Introduce BOGO Minis
- Strengthen the BOGO GO distribution network
- Expand into new cities and communities

03

PHASE

Enable Growth

- Scale technology across the ecosystem
- Build strategic business partnerships
- Expand the portfolio of specialised brands
- Strengthen customer engagement and loyalty

04

PHASE

Lead the Future of Retail

- Create an interconnected retail ecosystem
- Expand nationally through scalable formats
- Drive innovation through technology
- Deliver long-term value for customers, partners, and communities

From a **strong foundation** to a **connected national retail ecosystem.**

One Vision. Endless Possibilities.

BOGO was created with a simple belief: retail should do more than sell products. It should create experiences, strengthen communities, support entrepreneurs, and improve everyday life.

This vision drives every store we build, every brand we create, and every partnership we form.

Our Commitment

01 To Our Customers

Deliver experiences built on trust, convenience, and innovation.

02 To Our Partners

Create opportunities that encourage shared and sustainable growth.

03 To Our Communities

Build destinations that contribute to local economies and everyday life.

04 To The Future

Continue evolving through technology, collaboration, and customer-focused innovation.

THE BOGO VISION

Our vision is to build an ecosystem where retail is more connected, more accessible, and more meaningful for everyone, not just a collection of stores or a portfolio of brands, but a destination where businesses grow, communities thrive, and customers experience the future of retail.
